The approval will identify the classroom that will receive equipment. The notice will indicate the deadline for the operation of the video/audio equipment.

A denial of the request will provide a reason for denial and provide the requestor with information on how to appeal this decision.

Section 3.4. Notification. After a request for video equipment installation is approved, the Superintendent or designee will provide written notice, at least 5 days prior to installation of video equipment, to the parents or guardians of all students receiving special education services in a self-contained or other special education setting that will receive video equipment.

Ten (10) days prior to the end of the school year, the UT Permian Basin STEM Academy will provide notice to the parents or guardians of each student in the classroom or setting with a video camera that the video camera operation will not continue the next school year, unless a person makes a written request.

A notice will be placed outside of each classroom with video surveillance reading: “This classroom is subject to ongoing and continuous video and audio recording.”

Section 3.5. Installation of Video. Upon approval of a written request for installation of video equipment, the video equipment will be purchased by the UT Permian Basin STEM Academy.

Installation and operation will take place within 45 school days after the request has been approved. For a student whose ARD committee determines that a student’s placement the following year will be in an eligible classroom and the parent requests a camera placed in the classroom by the last day of the school year or the 10th school business day after the placement determination, whichever is later, then the camera will be installed by the 10th school day after the fall semester begins or the 45th school day after the request is made, whichever is later.

Video equipment will cover all areas in the classroom, except the inside of bathrooms or areas used for toileting or diapering a student, or removing or changing a student’s clothes. Incidental recording of a small portion of a changing room or bathroom is permitted. Audio recordings will cover all areas in the classroom including the bathroom and changing area.

Following installation, the UT Permian Basin STEM Academy will ensure the video equipment is properly operating, and then disable all live monitoring capabilities.
Section 3.6. Operation of Video Equipment and Maintaining Recordings. Video and audio equipment will operate at all times during the instructional day, during the regular school year and during extended school year (ESY) services. Recording will begin approximately 15 minutes before students arrive in the classroom, and end once all students are off campus.

The UT Permian Basin STEM Academy will continue to operate the video equipment in a classroom for as long as the classroom or setting continues to meet the definition of self-contained classroom or other special education setting, or if the request for video equipment has been withdrawn. If a classroom no longer meets the definition, or the request is withdrawn, the UT Permian Basin STEM Academy will send written notice to all parents and guardians of the students in that classroom that the video equipment will be discontinued 5 days prior to the discontinuing of the recording.

All recordings will be stored and kept for at least 3 months. If a person requests to see the video, the video will be kept until the person views the recording and a determination as to whether an incident occurred is made.

If an alleged incident is documented, the recording must be kept until the incident has been resolved, and the exhaustion of an appeal is complete.

During those 5 days, and during any subsequent investigation, the campus administrator will take any necessary measures to protect the student from possible harm. These steps may include:

- Changing classroom instructors or classroom assignment
- Provide counseling to student
- Add additional staff support to classroom

After reviewing the video recording, the campus administrator will provide written notice to the person reporting the incident of whether the alleged incident is recorded. Written notice will be sent within 10 school days after receipt of report.

Written notice does not suffice to meet the required reporting of abuse or neglect by the campus administrator or other personnel who views the recording. Any alleged abuse or neglect must be reported to the Texas Department of Family and Protective services immediately, or not later than 48 hours of becoming aware of the incident.

If an alleged incident is recorded, the campus administrator shall notify the UT Permian Basin
STEM Academy’s Superintendent or designee and a formal investigation in accordance with school policy will begin.

This section does not limit a parent’s or guardian’s rights under FERPA if a student is involved in a significant incident recorded by the video equipment. If the UT Permian Basin STEM Academy receives a request to view a recording under FERPA, the UT Permian Basin STEM Academy will provide notice to parents or guardians within 10 school days of whether the video is a student record defined by FERPA and will be available for viewing.

Information regarding an appeal under Section 7.058 of the Texas Education Code can be found on the TEA website.

If the TEA determines that it is likely that the UT Permian Basin STEM Academy will not prevail, the UT Permian Basin STEM Academy will comply with the request, even if the UT Permian

Sample Letter:

Dear Parent,

The UT Permian Basin STEM Academy determined on [INSERT DATE] that your child [may have/ may have been exposed to] head lice. Please examine your child’s hair and scalp for evidence of live lice, lice eggs, or nits (egg casings left behind after lice have hatched). Children with head lice should be treated as soon as possible to minimize the spread to other individuals.

What You Need To Know About Head Lice in School

What Are Head Lice?

- Head lice are tiny grey to brown insects about the size of a sesame seed that live in human hair and must feed on human blood to survive.
- They lay tiny white oval-shaped eggs about the size of a knot in a thread, called nits that attach to strands of hair close to the scalp. Although it is hard to see head lice, you can see the nits if you look closely.
- Nits are most often found in the hair behind the ears and at the back of the head and neck. The first sign of lice is itching of the head, which is caused by the bite of the head lice.
- Head lice do not spread disease.
How Do You Get Head Lice?
- Any child can get head lice.
- Head lice happen mostly with elementary school-aged children.
- Children get lice from other children through head to head contact during play or sports
  or nap time, and most often in school settings.
- Sharing combs, brushes, hair accessories, hats, or lockers can spread head lice.
- You can’t spread nits…only live lice.

How Do You Get Rid of Head Lice?
- Use an over-the-counter FDA-approved shampoo treatment found at drug and grocery
  stores. Follow directions on package exactly.
- Soak all combs and brushes in very hot water for about 1 hour.
- Wash sheets, blankets and other bedding in hot water.
- Seal stuffed animals in a plastic bag for 1 week.
- Vacuum carpets, furniture and mattresses thoroughly.
- Re-treat hair again in 7 days.

If You Suspect a Child in Your Classroom Has Lice
- Have the child checked by the school nurse
- Follow you school/district policies regarding head lice
- Educate children on avoiding activities that may spread head lice…remind them not to
  share combs, brushes, hair accessories, headphones, hats, clothing, bedding, etc.

How to Prevent Lice
- Avoid head-to-head (hair-to-hair) contact during play and other activities at home,
  school, and elsewhere (sports activities, playground, slumber parties, camp)
- Do not share clothing such as hats, scarves, coats, sports uniforms, hair ribbons, or
  barrettes
- Do not share combs, brushes, or towels. Disinfect combs and brushes used by an
  infested person by soaking them in hot water (at least 130°F) for 5–10 minutes
- Do not lie on beds, couches, pillows, carpets, or stuffed animals that have recently been
  in contact with an infested person
- Machine wash and dry clothing, bed linens, and other items that an infested person
  wore or used during the 2 days before treatment using the hot water (130°F) laundry
  cycle and the high heat drying cycle. Clothing and items that are not washable can be
  dry-cleaned OR sealed in a plastic bag and stored for 2 weeks
- Vacuum the floor and furniture, particularly where the infested person sat or lay.
  However, spending much time and money on housecleaning activities is not necessary
  to avoid reinfection by lice or nits that may have fallen off the head or crawled onto
  furniture or clothing
- Do not use fumigant sprays or fogs; they are not necessary to control head lice and can
  be toxic if inhaled or absorbed through the skin

You can find more resources and information regarding treatment and prevention on the Center
for Disease Control’s Website: https://www.cdc.gov/parasites/lice/head/

The UT Permian Basin STEM Academy
