

The purpose of the Bachelor of Applied Arts and Science (B.A.A.S.) program is to offer career advancement opportunities to students who have previously earned the Associate of Applied Sciences (A.A.S.) degree. The B.A.A.S. degree will enhance students' technical education and will prepare them with leadership skills relevant in their respective working environments. The B.A.A.S. program allows students to choose one of the three tracks that best suits their needs for professional development: Health Professions, Human & Legal Studies, and Industrial Technology.
