HSI-STEM PROGRAM

The HSI-STEM Grant is pleased to announce one of our undergraduate researchers participating in the Research Program for Undergraduates (RPU) has received funding from the National Science Foundation (NSF). Sarai Badillo will be supported by NSF funds to do full-time post-baccalaureate research in Dr. Hembry's lab for one year. Sarai Badillo is currently working with Dr. David Hembry, Assistant Professor of Biology, on a project titled *Diversity of leafroller moths (Lepidoptera Gracillariidae: Epicephala) in the southern United States*. Previously, Sarai also works with Dr. David Sparks on his Research Program for Undergraduates.
